

Papana & Norkko

Meeting location: Hiilinielu & Zoom-video-connecting-system-wormhole  
metsaesitys[a]gmail.com

AGENDA

3.9.2020

---

If you get stuck in an aikatasku ("time pocket") or get lost in a hiilipoimu (carbon fold) or any other kind of häiriö ("interference") happens in Hiilinielu – Carbon-Space-of-Possibilities ("carbon sink"), use this agenda to find your way through. In case of interference, you can also use the back-up media you have chosen together with squirrels before the Zoom meeting (whatsapp or similar) to share your findings.

## Future-Leap-Flying-Orientation-Interview

### 1§ Introduction

We (Papana & Norkko) are here to stop the ongoing mass extinction by developing interspecies collaboration. Remind yourself of who you are and why are you here. Be honest.

### 2§ Getting to Hiilinielu – Carbon-Space-of-Possibilities

Enter your Hiilinielu by listening, smelling, seeing and touching things. You can also sing this song:

*Tune in and think  
in the carbon sink  
time-space will link  
moss can be pink*

### 3§ Mapping of Hiilinielu

Make a list of things you find in your Hiilinielu – Carbon-Space-of-Possibilities. Search for different life forms that exist there. Choose one organism. Choose to love it.

### 4§ Future Leap

Develop a pulsating and delighting future between two species: you and the organism you chose. What would be your dream-come-true picture of your common future? Where would you be in the picture? What about the organism? How would you be connected?

### 5§ Make a toast for the Common Future

**Kaikki on mahdollista oravalle, jolla on esityslista!**
